

PULMONARY & VENTILATOR CARE

Every Senior Care Centers building is equipped to manage chronic respiratory disorders such as bronchitis, COPD or pneumonia. In addition, several buildings are also equipped to offer more complex respiratory care such as **Tracheostomy and Ventilator Care** services. A 24-hour on-site nursing staff specifically trained in respiratory management competencies is available, and many of these buildings also retain a full-time or on-call respiratory therapist, allowing for immediate treatment should complications arise.

- ⌚ Full-time respiratory therapist available at ventilator unit facilities
- ⌚ Treatment and management of acute and chronic lung conditions
- ⌚ Individual attention and support to help patients achieve their designated goals, including ventilator management and ventilator weaning
- ⌚ Extensive clinical capabilities to serve both weaning and chronic ventilator patients using onsite technologies
- ⌚ 24-hour skilled nursing and medical support services

The heart of nursing care is here.

For more information about Pulmonary/Ventilator Unit Care, please discuss this with your Care Plan Team or visit SeniorCareCentersLTC.com
